

Thankful, Grateful

Be thankful, be grateful.
All the things we got
Family, friends.
The classic things.
Food, water, shelter.
The things we need.
We need to care
the things we got.
Be thankful, be grateful.
Have a wonderful Thanksgiving.

Gratefulness can come in many different ways. It is always nice to appreciate the things we have gotten because out in the world there are some people who are in need of this. Be grateful you have a family or the fact that you may not be alone and loved. We have food, water, and shelter which are things we don't really care about even though they are very important in our lives. In the end we should be grateful for what we get regardless of how we feel because at least we got them.
