

Qualities I am thankful for
by: Daniel Gioia
Our Lady of Good Counsel school
5th grade

The qualities that I have that I am thankful for are... I am athletic. I am thankful for this quality because I can play sports with all of my friends on my teams. This is why I am thankful for being athletic. Another quality I have is that I am funny. I am thankful for this quality because I can make a lot of people laugh a lot. Another quality I have that I am thankful for is that I am smart. I am thankful for this quality because it is a good quality to have later on in life especially when I go off to college. I could go to a good college with my knowledge and then get a good job .

Another good quality I am thankful for is that I am outgoing and I make friends very easily. I am thankful for this quality because I can have a lot of friends and the more the merrier. Also, I am brave and I stand up for my brothers and my friends when people are being mean. Another quality I have is that I am a good leader. I am thankful for this quality because when I get a job I might become senator , mayor, governor , or president. An important quality I have is that I am helpful to my family , friends , and neighbors. I am thankful for this quality because I like to help out when I can. Another quality I have is that I am a Roman Catholic and I believe in Jesus Christ. I am thankful for this quality because I like to go to church and serve the church / parish community.

Another quality I have is that I am friendly to everyone. For example if there is a new kid in my school I am instantly friends with him/her because one I am accepting and two I am friendly and three I am outgoing and like to talk to people I don't even know just to become friends with them because I am friendly. I am kind to others . I am thankful for this quality because when you are kind it makes everybody feel happy and it makes the world a better place. Another quality I have is that I am neat. I am thankful for this quality because it makes the world a better, cleaner , and healthier place. Another quality I have is that I am optimistic. For example if I am playing sports and we lost but only by a few points like 42-44 the other team I would say to my teammates hey that was a great game that we played out there and we all tried our hardest the score was very high and we only lost by a few points . So as you can see I am optimistic. Another quality I have is that I believe in others . I am thankful for this quality because it makes not just me but my friends, my teammates, my family or whoever I am believing happy and when my friends achieve something I feel happy for them. I am thankful for this quality because when you do not believe in people it might make them feel sad and I would hate to see people sad. These are my qualities and as you can see I have a lot of good qualities and I am very thankful for all of them in the end.
