

Thankfulness

There are many qualities that people have that I'm thankful for. My intelligence is what I'm thankful for. The smell of the good gardens is sweet! The mindset I have after learning one thing is like a snap!

Growing up I always focused on my work. Never had a problem with my parents about doing homework. I'm really thankful for that. Others can have a different quality and it may not be intelligence, but that doesn't mean they are dumb it just means everyone has something they are good at. I love getting work done on time so I can play on my phone all I want, go out with my friends, get to smell very fresh air outside, and do whatever I want without worrying whether I did my work or not! That was one of the ways I improved my intelligence. This doesn't mean I never had laziness, in fact I'm always tired. The thing is when I'm lazy I always think to myself "Shouldn't I get work done so I can have a better future?" "Should I just stay on my phone so I can feel guilty in front of the whole class finding out I didn't do my work?" Intelligence is a good quality!

Others have many qualities. I'm thankful for my intelligence because it is a piece of cake to follow directions!
