

## **THANKFULNESS**

There are many qualities that people have, the qualities that I am thankful for are video games, mom dad and brother, and money / currency.

### **VIDEO GAMES**

My first quality that I am thankful for is video games because I enjoy the comfort it gives me at times that i can be a little mad. I am thankful for video games because they are fun, and really do calm my nerves, and help me relax at times when I am angry. Also because they make me not bored when I am bored, and give me a fun activity that I can sit and do for an hour or maybe more, I enjoy this release I can have from reality, even if it is just for an hour or so, it really does help as i mentioned before.. Also because I like spending all my money on them, when i want specific Fortnite V-Bucks to buy myself skins that look cool and the battle pass also. And lastly because when I am sad or mad they make me happy. One time I was mad because I got an F, then I was honest to my parents that I got the F, and then my parents yelled at me, so I played Fortnite and won. That made me happy because I like when I win in Fortnite or any other game too, because winning a game gives a unique feeling of victory.

### **FAMILY**

My second quality that I am thankful for is my mom, dad and brother. I am thankful for my mom, dad and brother because they help me alot with activities I find challenging, my older p[arents and brother can very much help me when I'm stuck on homework or anything else like, for example, Math can get challenging for me and my brother helps me. My brother always helps me out with most of my homeworks when i am stuck on them, I really appreciate and am thankful for my loving brother that I love very much for this. He is very nice and friendly to me. Also because I have known them since I was born, and they have helped me along the way as I was growing up. I am lucky to have older relatives to teach me the ways of life from being born. Also because they help with my homework and they also help me in general with daily things like cleaning my room when I am not there to do so myself, which helps me a lot when I am in school and cannot clean it myself. And lastly because they care about me, and would never be mean to me when something is challenging, they would support me and make me keep going. This helps me a lot to do things. One time I was having trouble with an assignment and I told my mom, dad and brother and they helped me with it and I got a 100% on it and then I was very happy that I got 100% on that assignment, because by myself I would have probably gotten a worse grade, like maybe a b or c. This really has my thankfulness and helps me out a lot.

## **Money / Currency**

I am very thankful for the existence of money or any types of currency in this world. Currency helps us get food and material we need, as in homes, soup, meat, vegetables and other necessities would very much need to survive in this world. In my life, I have bought lots of things with Money, the currency being US Dollars. With them my brother and I bought ramen noodle soup, with chicken and pepper flavoring, and a sports drink (vitamin water.) These helped us be more energetic and not be hungry, this shows how the currency helped us out a big amount, without it me and my brother would have been hungry. So this is why I find the item of currency or money very important to me, which is why me and my family are very thankful for the money and currency existing in our lives to help us out with the things we would need to survive, and live my daily life with.
