## Thankful essay

I have a lot of good qualities. One is good will. Good will means I care for others. I am thankful for good will because I can make new friends. An example is, if somebody needs something I can help. If a friend needs help with their homework, I can help them. That is why I am thankful for good will.

Another good quality is being athletic. I'm athletic when I dance. I am thankful for being athletic because I love to dance. Another reason is I love doing flips and being flexible. If I wasn't athletic, I could not dance. That is why I'm thankful for being athletic.

I am also thankful for being friendly. I am friendly a lot. I am thankful for being friendly because I can make good friends and new friends. We get things done faster and we don't fight at all. If I wasn't friendly I would not have good friends. That is why I am thankful for being friendly.

The last quality about myself is that I am funny. I am thankful for being funny because I can make people laugh and smile. I am also thankful for being funny because if somebody is sad or mad I can cheer them up. Being funny is fun because I can laugh at myself too and have fun with people. That is why I am thankful for being funny.
