### Thankful Essay

One quality I am thankful for is my creativity. I am thankful for my creativity because it makes me good at art and it also helps me make friends. I also am thankful for my creativity because it makes me good at building my own designs out of Lego. Because of my creativity I might be hired by Lego someday.

Another quality I have is my bravery. I am thankful for my bravery because I went down a 30-foot drop without much hesitation. I was really proud of that, but next year I'm going back there for The Leap of Faith, a 40-foot drop. Overall this is one of my favorite qualities.

My third quality I am thankful for is my caring for animals. I am thankful for this quality because it helped me and my mom decide to save a kitten that we own and his name is Ozy. I also have two cats and one dog. I am mostly thankful for this quality because it makes animals like me.

The last quality I am thankful for is my athleticism. I am thankful for this quality because it helps me make friends like Marcello and Drew. This made me join a sixth and seventh grade soccer team for my school. This quality is the best quality I have because of all the friends I make.

All of these qualities help me in life like making friends and having a good life.
