

Hi my name is Aiden Thompson. I'm from upstate New York. I live in Elizabethtown. Some hobbies include playing sports like baseball, football and soccer. There are 3 traits I like about myself. I'm Intelligent, Energetic, and Competitive.

I think I'm intelligent because I raise my hand a lot in math class. Also most of the time, I'm right. I'm thankful for this quality because it makes me feel like I'm a smart person. I can still grow my brain though. I'm still going to grow my brain too! This quality can help me in the future. I can be a teacher if I want to be.

I think I'm energetic because I like to play lots of sports like baseball and football. Also, sometimes I like to play soccer and basketball. I picked this trait because I love baseball, football, soccer, and basketball. I am energetic because when I'm playing baseball I hardly break a sweat, same with Football. I'm thankful for this quality because I really feel like I'm athletic. This quality will help me in the future because, maybe, I might be a college quarterback.

I feel like I'm competitive because I really love to compete in challenges. Sometimes I don't always win though, but I don't mind. One competition I competed in was capture the flag. I tried really hard and we won. I also play a lot of pool and win. I chose this quality because I'm really competitive in any sport. I'm thankful for the quality because I feel I can compete in all competitions and win. This can help me in the future because if I'm going to be in a competition I might win.

All of these traits I feel go deep within me. I know I'm smart but not the smartest. I'm energetic because I love sports like, Baseball, football, soccer, and Basketball. I'm also competitive because I love tough competitions. Although I feel like I have all of these qualities, I can still grow in all of these areas. Thank you for reading my essay.

Sincerely, Aiden.Thompson
