

## **What Are You Thankful For?**

By Brandon Willard

I am thankful for many things. Three of them are technology, transportation and friends.

The first thing I'm thankful for is technology. One reason is it allows you to play with friends far away and friends that are close to you. Another reason why I'm thankful for technology is you can buy fun games that you can play with friends and it gives people that work there money. When there is more games stores will need more workers so they will earn more money since they will be able to check out people quicker.

The second thing I'm thankful for is transportation. A reason why I'm thankful for transportation is you don't have to walk everywhere you go. You also don't hurt animals as much because you aren't riding animals as much. It is also much faster.

The third thing I'm thankful for is friends. Friends help you when you are having a hard time and when you are having trouble. You also don't feel lonely when you have friends because they take the time to interact with you and play with you. They also don't laugh at you. They laugh with you.

Those are three things I'm thankful for.
