

Dear, Senator of New York,

This Thanksgiving I am thankful for a lot of things but something that I am really thankful for are , my grandparents. There are a lot of reasons why I am thankful for my grandparents but one reason is because of my faith. My grandparents always influenced me strongly in my faith and in God, there the reason my family members are Roman Catholics. If it weren't for my grandma I would have never been inspired to learn the Our Father and Hail Mary in Spanish. Another thing my grandparents influence me on is my work ethic . One way they influence me on my work ethic is by teaching me how to sweep, cook, and to handle my responsibilities early. A final reason describing why I am thankful for my grandparent is because like I said earlier they taught me how to pray, I am grateful for this because recently my family and I have been going through a tough time, my grandfather was diagnosed with cancer in early September, this was a tough time for my family because my grandfather was at risk of dying and there was really no way the doctors could help him help . The doctor said 'it was a miracle he was alive". When the doctor said that a light went off in my head. I thought about the prayers my grandma taught me and I said them because I remembered that God heals and forgives all . These are three reasons describing why I am thankful for my grandparents.

From, Daniel Lopez
