

I am thankful for my family, home and world. The first reason I am thankful is my family because I love them and they love me. Also we play games and have a lot of fun, they keep me safe.

The next reason I am thankful is my home. My home gives me shelter when it's cold, windy, rainy and stormy and also when it's too hot I can go in the shade.

The last reason I am thankful is our world because our world is a planet, the planet Earth. Earth keeps us alive because it has food and water and oxygen.
