

“I Am Thankful”

I think the word thankful means to be full of thank. For example I am thankful for food because without food you would die of hunger. I am also thankful for a good and loving family because without parents and sisters, who would love me and raise me? I am thankful for friends because you have people to go to that make you feel comfortable when you talk to them if something is wrong or maybe just to laugh with and have fun with. I am also thankful for clothes because without them you would go NAKED!!!! I'm thankful for shelter because I don't want to live on the streets. I am thankful for school because without school really you wouldn't know anything like what one plus one is or what three fourths times ten fifteenths is. School teaches you almost everything you will ever know in your whole life like math which helps with everyday problems. For example if I have a family of 10 how many pizza slices will each one of my family members get if there are 29 pieces of pizza? I am also thank for music because it gives me something to do when I'm bored cause I can sing “shake it off shake it off I shake it off” without music I wouldn't know what to do because music is my life. Also, I am thankful for love because without it no one would exist. So also thank god for reproduction cause without reproduction no one would exist. By, Olivia Rudd
