

Love The Earth

Reduce

We should use less plastic and paper bags and use more fabric bags because it is better for our environment. We should also save water. So when you not using to sink you should turn it off to save water and you should do the same thing to light.

Reuse

Things that we should reuse are plastic water bottles, egg cartons, bathroom items and jars. One example is you can use plastic bottles to make a bird house for your yard instead of throwing it away you can always make something.

Recycle

You should recycle any plastics instead of throwing it out because when you recycle plastic they smash it and make it into a water bottle for example and we can use it when you throw it out the plastic can end up in the ocean and the animals can get sick from it or even die.

Reminders

- You should pick up any garbage you see people drop or even if you drop it.

- We should always keep our planet clean, by picking up litter, reusing any plastic or using less of something.

Fun Facts

- Some people in the world don't care that our planet is getting polluted. So I need you to be that person and help our planet.
- An estimated 8 million tons of plastic enters our oceans every year. It is very harmful to our ocean creatures.
