

Poem by Zaid Badoolah (Mineola High School)

**Our Power, Our Planet**

Earth is our home

Not to be full of waste

Protect each biome

We must make haste

Not just trash

But emissions as well

There are massive amounts of carbon

It's hard not to tell

Use cleaner energy: Water wind and solar

It's better regardless of our politics, no matter how polar

Do not wait for an enlightenment

The time is now to help our environment
