

I'm thankful for this year is my beautiful family that i really care about and having a roof over my head, like my mother is always work hard for me and my brother and sometime cleans the house most of the time, food and water is the one that i'm really thankful for just because i can try different types of food, and it keeps me alive like there wasn't no food at all everybody will go crazy and most people will die, and it makes me happy, the third one is having a tv because i can watch any type of shows and movies on Netflix, HBO, and Tubi or watching youtube videos, I'm most thankful for having thanksgiving because of the food that my family makes, and the thanksgiving parade. I show my gratitude by helping around the house or seting up the table for thanksgiving or clean the dishes more of than just to show that i'm grateful for what my mom and dad have done for that family.
