

## **I Am Thankful For My Family**

**By Daphne Grouzis**

What are you most thankful for? I am thankful for my family because they hang out with me, they feed me and take me places, and also because they help me with challenges so I succeed. I think my family is amazing!

One reason I am thankful for my family is because they hang out with me. One example is whenever I am bored my family invites me to talk or watch TV with them. Another example is sometimes me and my family go out for lunch. A final example is sometimes my brother asks me to play games with him.

Another reason that I am thankful for my family is because they feed me and take me places. One example is my parents sometimes take me and my brother to Greece, Florida, and more. Another example is my family provides me with three meals a day. A final example is my parents drive me to school and sports.

One final reason that I am thankful for my family is because they help me with challenges so I succeed. A first example is when my homework is hard my family always helps me with it. A second example is when I have a quiz or test my parents help me study for it. A last example is whenever I have to practice sometimes my parents remind me to practice.

In conclusion, I love my family! I am thankful for my family because they hang out with me, they feed me and take me places, and lastly they help me with challenges so I succeed. I will never forget our many trips to Greece. My family is great!
