

Shelter for Me

A roof over my head is the safest, that is why I have gratitude. Gratitude is being thankful whether it is big or small. When I have a roof over my head I can feel safe and warm especially in the winter. I pray for people who have no roof but instead have mud or cardboard not a safe metal or a safer type of roofing. Under a roof over my head I have supply of water and warmth. I am very thankful to have a roof over my head because a lot of people do not. In my shelter I have family that are in the same roof for me. If I also did not have a roof over my head I feel that I would be lonely and probably would not feel as much loved. I thank God everyday for everything He has given me.
