

I Am Thankful for My Siblings

By Hadley Goodwin

Everyone should know that I have the best siblings ever. I am thankful for my siblings because they make me laugh, when I am bored I always have someone to play with and when my parents are gone they can babysit me. For these reasons this is why my siblings are the best!

The first reason why I am thankful for my siblings is because they make me laugh. First when I am sad they make funny jokes to make me feel better. Second, when my parents aren't looking, they make funny faces. One time my siblings made me laugh so hard that I fell on the floor laughing.

The second reason I am thankful for my siblings is because when I am bored I always have someone to play with. For example when it's a nice day my siblings and I play football and lacrosse together. We play lacrosse because it's my and my sisters favorite sport. We also like to play football because me and my brother both play it. Another example is in the summer my siblings and I all go swimming together. It's so fun because we make slip and slides with soap and water. It made the water get really soapy and awesome. One time, in the winter all of us made a snowman together. It was really fun because the snowman was almost taller than me. We worked together to make the snowman really tall.

The third reason is, I am thankful for my siblings because when my parents are gone they can babysit me. One time when my siblings were babysitting me we played a game called top chief. The rules of the game are, we rate each other's food we make for each other. Another reason why I like when my siblings babysit me is because they let me stay up later. Lastly, when my siblings babysit me, sometimes, we make slime together. My favorite part is when we add different colors to it and make different textures.

In conclusion, I am thankful for my siblings because they make me laugh, when I'm bored I always have someone to play with, and when my parents are gone they can babysit me. When I'm with my siblings I feel like I can tell them anything and be myself around them. To sum it up, this is why my siblings are the best friends I could ever have.
