### **What I'm thankful for**

I'm thankful for three people because they always make me happy and make having fun at school. They are so fun and they always keep my secrets. The three people that I'm thankful for are Thyfany, Aliyah, and my cat. I'm thankful for them because they always make me happy and they make my day fun.

I'm thankful for Thyfany because she always makes me feel grateful when I'm sad. For me, Thyfany is so special because she is always there for me when I need it. She is also so funny because she is always doing something to make me happy. She never wants me to be sad or serious. She is so pretty but sometimes she says that she is ugly. I always tell her to not say that to herself because she is so pretty. I like her attitude, her way of being because she is too positive in her things. We always call, we always play games and we also went to halloween together. We had really fun moments together. We also have things from each other. I knew her in 7th grade. She was a new student in the school and when I saw her in my mind was that she was a nice person and she was also pretty. I thought that we would not be friends but now we are friends. She is also the reason why I come to school everyday and the reason that makes my school day fun. I am thankful for Kili. She always makes my day happy when I get home from school. She is always waiting for me at the door. When I'm sad she always goes to my room and she stays there with me. She likes to be with me and sleep with me but at night she always has to stay out of my room because she likes to sleep in her bed. She is so cute. I like her way of being and I like her way of being there with me.

I'm thankful for Aliyah because she always makes me feel happy in class. When she doesn't come to school I miss her because she is the one that makes me happy in class and class without her it is so boring. She is always with her, always supporting me. She is so nice to me and so kind. She is always saying things to make me happy, always telling jokes.
