

The Lowell School

This year I am thankful for school and the ability to learn, read, and have friends, fun and good memories. It gives me the confidence to accomplish things in life and be independant. School is a good motivator will give me a good future, a good career, job, and educated me. It is helpful, and some time is relaxing to me but I really am thank fall for it and glad that it is a part of my life. I really appreciate it and how it helps me and my future self, to keep going and push through the rough, difficult times. It has been difficult for me to read but school has given me the tools to read better.
