

A School of Gratitude

I am thankful for many things on this earth and in the sky
But most of all I'm thankful for my school and now I'll tell you why,
I love how in my school we learn about science and math
We learn about history, reading and taking the right steps to the right path.
But most of all about my school I love the way Jesus shines through every child here
I love when you look inside each student, the fruits of the Spirit appear
In Chapel every Wednesday, the gospel's preached to us,
By men of Christ who love to talk about the Word and discuss.
I want to be just like them, to spread the light around
To go to foreign countries and preach in foreign towns.
But I know I may not be brave enough to stand up and preach
I know how much I love the Word and how I love to teach,
My school will help me decide the right path for me
Would I stand and preach for all the world to see?
Only God knows that answer, so I'll wait patiently,
And in the meantime I will learn in this school I love so dearly.
