Medina, NY 14103

The world as we know it can be doomed
but there is a way to solve it recycle
We can recycle by making sure things
Are put in the right place
Make it easy
Use the three big r's recycle, reduce, reuse
Number one always try to keep everything
That needs to be recycled are in the recycle bin
Reduce, now that's a big word that can be used
First, organize all your trash
Now put it in smaller groups
Now the final R is reuse
Always check that everything you use can be reused
Don't throw it away
Always check if it can be used more
That's it now you know three big R's.
