

By Jack Caggiano,

Help out the Earth Day.

we
need
trees

we have one
planet, so take care of
it.

we
need
trees

We should plant trees because
it produces oxygen, so we can
breathe.

Stay Green

We should use more natural
resources on land and water. Oil spills
can destroy animals homes, to prevent this
we can put it only ~~where it is~~ ~~needed~~ Also the

Smoke can create
air pollution and
sometimes prevent of air

And some times
make birds sick, to pre

the smoke we can
make filters to make
into fresh air
