

Our power are planet

Oceans as large as a life time, looking so bright

Universe having stars not going out, the shine helps us out

Rain grows grain till they die feeding us so we grow

Powering the earth is what we have to do

Owing the respect that we for the earth

Wondering if we have got it right

Electricity make the light for the future

Read the books the trees gave

Our amazing wonders we have not explored

Using are hands feeding are others

Raking leaves that fell from are trees

Planet giving us what we need

Living things roaring and being loud

Ancient ruins giving us the roots

Nature guiding the way

Earth's flow shaking the stone

Tide to are feet
