

MY PROJECT LOOKS AT HOW FACTORIES RELEASE CO2 AND OTHER GASES THAT POLLUTE OUR AIR AND CAUSE GLOBAL WARMING. THIS IS A HUGE PROBLEM FOR HUMANS, ANIMALS, AND THE FUTURE OF OUR PLANET. MY SOLUTION USES CONDENSATION TO CAPTURE THAT GAS BEFORE IT ESCAPES. INSTEAD OF LETTING IT POLLUTE THE ATMOSPHERE, WE CAN TURN IT INTO SOMETHING USEFUL—LIKE RECYCLED FUEL FOR CARS OR EVEN ROCKETS. IT'S A WAY TO TAKE A MAJOR PROBLEM AND TURN IT INTO A REUSABLE RESOURCE
